***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a computer-implemented method for determining an amount to be billed to a customer for using and reserving computing resources. The prior art fails to teach that the amount to be billed to a customer is based upon usage data, value data and a reservation fee and a reservation fee is "for reserving for the customer other computing resources from the plurality of computing resources that are not included in the set of one or more computing resources assigned exclusively to the customer." Thus, the approach includes billing a customer a reservation fee to reserve computing resources that are not currently assigned exclusively to the customer, but that might be in the future. This is useful in situations where a customer may need additional computing resources to handle an upcoming spike in demand, for example because of the launch of a new Website, but does not currently have sufficient resources to handle the demand. The billing of the customer includes the reservation fee for reserving the additional resources.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior art includes:
